

KEY INVESTOR INFORMATION

FINSERVE
NORDIC

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

Finserve Global Security Fund I, a sub-fund of the LUX MULTIMANAGER SICAV

Class S SEK – Capitalisation shares: ISIN LU1822851371

Management Company: BIL Manage Invest S.A.

OBJECTIVES AND INVESTMENT POLICY

- Finserve Nordic AB manages the investments of this sub-fund.
- The sub-fund's investment objective is to achieve appropriate income and the highest possible long-term value increase by investing within the defense and security sector (homeland and cyber security). The sub-fund will invest mainly in securities of companies without geographical restrictions with the exception of Russia and China and in accordance with the principle of risk diversification.
- No guarantee can be given that the sub-fund's objective will be reached.
- The policy and strategy used to pursue the investment objective is to invest mainly (at least 51%) in US/EU listed equities in security/defense sectors. Any company being considered as an investment must have a publicly available code of conduct and ethics that addresses legal responsibilities and ethics and that explicitly lists how it complies with international laws.
- The sub-fund adheres to a policy statement for target company screening and exposure to controversial investments with an indiscriminate and long-term humanitarian impact on society. International conventions/treaties ratified by NATO and OECD member nations determine the fund's policy.
- The sub-fund may temporarily hold up to 49% of its net fund assets in cash and cash equivalents and invest in similar assets.
- The sub-fund may use derivatives, certificates with embedded derivative components (discount, bonus, leverage, knock-out certificates, etc.) and other techniques and instruments for hedging and efficient portfolio management, for maturity or risk management of the portfolio or to generate income, i.e. for speculative purposes. In case such transactions relate to the use of derivatives, then the terms and limits must comply with the investment limits.
- This sub-fund may not be appropriate for investors who plan to sell their shares in the sub-fund before 5 years. Investment in the sub-fund should be regarded as a long-term investment.
- Shares can usually be bought and sold each business day.
- This sub-fund is an actively managed sub-fund and uses MSCI World TR USD Index (100%) as benchmark for comparative purposes only. Its performance can deviate significantly from the Benchmark.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk and reward profile is classified by the level of historical fluctuation of the net asset values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level. If the fund was launched less than 5 years ago, the risk category is calculated on the basis of the performance of the benchmark; if this is not available, other objective classification criteria are used.
- The historical data may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

Investors should be aware of the significant risk below, which may not necessarily be adequately taken into account by the indicator:

- Investment risk: the investments within the investment portfolio will be subject to normal market fluctuations which translates directly into the price of shares in the Sub-Fund. Investors should be aware of the risk factors present when investing in equity.
- Political risk: the value of the company's assets may be affected by uncertainties such as political developments, changes in government policies, taxation, currency repatriation restrictions and restrictions on foreign investment in some of the countries in which the company may invest.

A detailed account of the risks is given in the section "General risk information" in the sales prospectus.
